VARIETIES	ESPALIERED			DWARFS			
	HORIZONTAL CORDON			3/4"-3/8"	3/4"-5/8"	5/8"-1"	1" & up
	1 Tier	2 Tier	3 Tier	Trunk	Trunk	Trunk	Trunk
✓ ALMONDS							
I.X.L.—Nuts are large and symmetrical; shell soft, smooth; kernel large and well filled.							
NE PLUS ULTRA—An excellent type; good producer; pollinizer; nuts medium to large; flavor good.							
✓ APPLES							
BEVERLY HILLS—Cross of Melba and Early McIntosh. Fruit has white flesh, skin pale yellow with red stripes and splashed with red, quality very good. Well suited for Southern California coastal climate. Early Summer.							
CORTLAND—An attractive red, darkly and obscurely striped apple with white flesh, slow to discolor on exposure to air, very good for cooking, dessert or market. Annual bearer. Late.							
EARLY CRIMSON—This apple ripens a week ahead of Yellow Transparent. Good eating and cooking. Fruit is brilliant red. Early.							
GOLDEN RENETTE—A large golden-yellow apple, with a rich flavor. October.							
GRAVESTONE—A large attractive orange-yellow apple overlaid with stripes of red. August.							
KING—A large apple of beautiful red on a yellow background, crisp flesh, juicy and a good keeper. Late.							
KING DAVID—Very large fruit, handsome red; excellent for dessert. Ripens in Winter.							
LODI—Looks similar to Yellow Transparent, but is larger, does not grow mealy as quickly, keeps better, ripens a little later. Early.							
NORTHERN SPY—One of the finest apples with large fruit of thin skin and pale yellow ground-color nearly concealed with bright red. Late.							
RED DELICIOUS—A red striped, long pointed apple of fine flavor and bouquet. October-November.							
RED GRAVESTONE—A deep red Gravenstein apple with excellent quality. Fall.							
RED JONATHAN—One of the finest winter apples; skin is bright red, thin and smooth. Flesh is crisp, juicy and a pleasant sub-acid flavor. Highly valued as a table and cooking apple. November.							
RED STAYMAN—An offspring from the Winesap—although the fruit is larger. Late.							
WHITNEY CRAB APPLE—This crabapple has all the good qualities of the best crabapples. Fruit is large, uniform in size and shape, skin is light yellow shaded and striped with red. August.							
YELLOW DELICIOUS—Large golden-yellow fruit. Flesh crisp and juicy, of very fine texture. Hardy grower, prolific bearer. September.							
YELLOW NEWTON—Medium to large fruit. Greenish yellow to yellow; good eating and cooking. Ripens in Winter.							
YELLOW TRANSPARENT—A very early medium large, pale yellow apple. Abundant bearer. August.							
✓ APRICOTS							
BLENHEIM—Large, oval. Yellow, rich and juicy. Regular and prolific bearer. August.							
PERFECTION—New. Extra large fruit. Flesh firm, juicy with rich flavor. July-August.							
ROYAL—Flesh is deep orange with red cheek; rich and sweet flavor; medium size; good bearer. August.							
TILTON—Fruit large size; rich apricot color; flavor of highest quality; bears very heavy. August.							
WENATCHEE MOORPARK—Very large size; skin orange with red cheek; flesh firm; juicy; good flavor. July-August.							
✓ CHERRIES, Sweet (SEMI-DWARF)							
BING—Large fruit, black; very fine. July.							
BLACK REPUBLICAN (Pollinizer)—Fruit dark color; rich, solid and an excellent keeper.							
BLACK TARTARIAN (Pollinizer)—Large, purplish black, half tender; flavor mild and pleasant.							
DEACON (Pollinizer)—Similar to Black Tartarian as to color and size, but superior in texture.							
LAMBERT—Very large fruit, dark-red. Flavor sweet, or very mild sub-acid, aromatic, rich. July.							
VAN (Pollinizer)—Fruit is Bing type; firmer and just as large; sweet; bright black somewhat resistant to cracking. Earlier than Bing.							
ROYAL ANN—(Napoleon Bigarreau) pale yellow with bright red cheek, flesh very firm, juicy and sweet. One of the best for canning. July.

U. S. ESPALIER NURSERY CO.

An Espalier tree needs no more space or care than a rose bush. Genuine U. S. Espalier Fruit Trees are propagated from true dwarf roots which limit their size and growth. They come from the nursery ready-trained, with complete instructions for planting and care.

VARIETIES	ESPALEERS			DWARFS				
	HORIZONTAL CORDON	1 Tier	2 Tier	3 Tier	¾"-¾"	¾"-¾"	¾"-1"	1" & up
✓ CHERRIES, Sour (SEMI-DWARF)								
MONTMORENCY—Large; red, tender flesh; mildly acid. One of best canning varieties. Late June.								
OSTHEIMER WICHSEL—Very hardy; flesh dark-red with much very dark-colored juice; sprightly, tart, free stone.								
✓ NECTARINES								
BOSTON—Medium; deep yellow with a bright blush and deep mottlings of red; flesh yellow without any red at stone; sweet; freestone.								
QUETTA—A new variety; flesh yellow and highly colored; very hardy.								
✓ PEACHES								
EARLY CRAWFORD—Large, roundish bright yellow with red cheek; flesh yellow, juicy and sweet. August-September.								
ELBERTA—Large size, freestone, bright color, yellow flesh. September.								
GOLDEN JUBILEE—A new yellow freestone ripening ahead of the Rochester; firm, rich in sugar, delightfully fragrant. July to August.								
HALE HAVEN—A new variety of outstanding merit. Fruit fine grained, firm, rich, golden fleshed freestone. Bears very heavily. Ripens two weeks ahead of Elberta.								
J. H. HALE—Very large; globular; deep yellow overlaid red. Very solid flesh. September.								
KIM EARLY ELBERTA—A highly colored freestone; flesh yellow with small pit. Ripens earlier than Elberta.								
RED HAVEN—One of the earliest freestones, ripening about 10 days ahead of Golden Jubilee. Bright red color with creamy yellow background; smooth skin; heavy bearer. July to August.								
VETERAN—A yellow-fleshed freestone similar to Elberta but matures earlier.								
ROCHESTER—Yellow freestone, good size, very sweet and fine flavor. August.								
✓ PEARS								
BARTLETT—Large size, with beautiful blush next to sun. Very juicy and high flavored. Strong grower. Very popular. August-September.								
BOSC—A high quality variety with a distinctive long neck, fruit large, yellow and extra sweet. Excellent for both cooking and eating. October-November.								
CLAPP'S FAVORITE—Bright yellow with red cheek. Rich flavor. Sweet and refreshing. Flesh melting, very pleasant flavor. September.								
COMICE—Large; crimson cheek; melting; perfumed; flesh luscious. October-November.								
D'ANJOU—Large; buttery, melting, vinous flavor. November-December.								
FLEMISH BEAUTY—Fine looking large fruit, juicy. Strong grower and good bearer. September-October.								
HARDY—An early full pear, large lemon-yellow over-spread with cinnamon russet. Very juicy and sweet. September.								
TONGREEN—Large, golden brown dotted with soft red of extraordinary beauty. Fruit ripens in early fall and is juicy and highly flavored. September.								
WINTER NELIS—A delicious winter pear of medium size; flesh yellowish white; very juicy when ripe. December.								
✓ PLUMS								
BURBANK—Beautiful dark red with delicate bloom. Flesh rich yellow. Small stone. Fine quality. August.								
CLIMAX—Beautiful cherry red; yellow-golden meat; delicious flavor; large, heart-shaped. July.								
ITALIAN PRUNE—A fine late prune. Oval, purple fruit. Juicy and very productive. Delicious. September.								
PEACH PLUM—Fruit large and one of earliest to ripen; regular, roundish; skin red; flesh greenish-yellow; tinged with red at maturity; rich flavor. July.								
PLUMCOT—A cross between the plum and apricot. Purple-red fruit with solid blood-red flesh; sub-acid flavor. August.								
SANTA ROSA—Large; purplish crimson; flesh yellow, mottled crimson. July-August.								
SATSUMA—Very large; well flavored with blood red flesh; skin red; small pit; good for canning. July.								
SHIRO—Egg-shaped; medium size, smooth, bright yellow. Very productive. August.
